Additive Manufacturing Application

# **Available Product Variants**

15 - 45 µm

45 - 90 µm

#### **Product Description**

The BÖHLER L718 AMPO is a hardenable nickel-base super alloy. This high heat-resistant material shows good strength properties at elevated temperatures up to 750 °C, as well as excellent creep resistance up to 700 °C. In addition, it shows excellent corrosion resistance and good printability. Essentially, the same properties can be achieved with printed components made from this powder as with bar material.

#### **Process Melting**

VIGA

# **Applications**

- > 3D Printing direct metal deposition
- > Automotive Racing
- > CPI (incl. LNG, Urea)
- > Other Components
- > Powder for additive manufacturing
- 3D Printing selective laser melting
- > Civil and mechanical engineering
- > Oil & Gas
- > Other Oil and Gas + CPI comps.
- > Automotive
- > Comp. for Industrial Gas Compressors
- > Oth. Automotive components (Turbochargers, Piston Rings, Sensors, etc.)
- > Other Power Generation Components
